

Comment Info: =====

General Comment:I have been a handloader/reloader of centerfire ammunition since 1950. I have been a customer at innumerable retail stores during these fifty-seven years. Unless there has been some notable increase in accidents involving the methodology of storing powder and primers, I fail to see the need for any new regulations. I've not seen what I would consider to be unsafe practices in these retail stores.

Regards,

Arthur L. Eatman
